Two New Derricks Start This Week in Central Alberta's Oil Fields

Edmonton and Calgary Business Men Well Impressed
With Wainwright Oil Conditions

The superintendent and men from the Hungerford Drilling Co. of Shelby, Montana were in Irma the first of this week for lumber for a new derrick for a well this company intends drilling immediately, on Section 29-48-10-W4, near Rodino Post Office, north west of Irma. This well is for a Company from Duluth, Minnesota, and is the first of two wells that the Hungerford Drilling Co. have contracted to drill. The second derrick to be started on L. S. 13 of Section 6-45-6-W4, about two miles north of Wainwright. This derrick is for the Beth-Wain Oil Co. of Toronto and the machinery is being moved to this location from Wainwell No. 4 which has just been completed. The pumping equipment was installed at Wainwell No. 4 Tuesday but before a test of the well could be completed, something happened to some of the equipment and in trying to get it repaired one of the men working at the well met with a serious accident resulting in the serious crushing of his hand.

Sunday, some fifty Edmonton and Calgary business men visited Wainwright and saw the different wells that have been completed and many that are in the process of being drilled. When the train arrived, which happened to be some three hours late, the party were taken to the New Masonic Hall where the officers of the Wainwright Board of Trade welcomed the visiting oil men and outlined the programme that had been arranged for their visit. Mr. J. M. Dougherty, field manager of the Onalta Oils Limited gave a very interesting and instructive talk on the value of the oil being produced in the Wainwright field.

Mr. Dougherty predicted that within the next five years, this district will be producing hundreds of thousands of barrels of petroleum daily.

ELECTED DIRECTOR

HUDSON MOTOR CO.
President W. J. McAnaney, of the Hudson Motor Car Company, following the annual stockholders' meeting this week, announced the appointment of E. W. Sheldrick to be secretary and a director, and C. C. Winningham, to be a director.

Appointment of these two men to the directorate preserved the jealousy guarded tradition of the company which almost makes it a necessity that the men who direct it must have come up through the ranks. Mr. Sheldrick qualified by reason of his 18 years' service with Hudson, manufacturers of Hudson and Essex cars, while C. C. Winningham's association with the company goes back 20 years. He is president of his own advertising agency, which has handled Hudson advertising since 1909. Prior to that he was Hudson's advertising manager and, later, director of sales.

LEWISVILLE SCHOOL REPORT

FOR-MONTH OF MAY
Grade VIII.—Thelma Saville, average 69.8, Louis Voros 63.
Grade VI.—Harry Saville 76.4; Margaret Skoze 62.1, Pearl Rubenok 58.8.
Grade V.—James Saville 65.5, Elmer Skoze 56.8.
Grade IV.—Frank Voros 63.2.
Grade III.—Kathleen Saville 83, Vera Voros 81.
Grade I Sr.—Margaret Voros 93, Doreen Saville 89.
Grade I Jr.—Della Cotton, very good, George Voros, very good.
Norine A. Pavey, (Teacher).

NOTICE OF POUND SALE

Notice is hereby given under Sec. 33 Domestic Animals Act that One Bay Horse, forefoot and tail trimmed, no visible brand, was impounded in the pound kept by the undersigned located N.W. quarter of Section 30-44-8-W4, and if not redeemed will be sold on Saturday the 6th day of July, 1929.

F. C. Wiese, Poundkeeper.
George Ambler returned from Edmonton Wednesday.

CORRECTION

In the report of the minutes of Municipality of Battle River in last week's Times it stated that a speed limit of 10 miles per hour be put on both sides of the hill through Section 15 and 16-45-8-W4. This should have read range (9) instead of 8.

BATTLE RIVER RALLY AND CONVENTION, JULY 15-16 AT WAINWRIGHT

The Battle River U.F.A. and U.F.W.A. Constituency Association: A U.F.A. Rally and the Annual Convention of the above association will be held at Wainwright on Monday and Tuesday, July 15th and 16th.

Somewhat different arrangements have been made this year from previous years. At the last convention it was decided to hold an open air meeting in the Buffalo Park on the afternoon of the first day, Monday, July 15th, 1929.

The committee in charge, have arranged for games, etc., during the afternoon, a picnic lunch at 6 p.m., followed by a few short speeches, and a musical program.

The park, its lake swimming pool and other attractions, is an ideal place to hold a picnic, and by taking advantage of this we will be able to combine business with pleasure.

The speakers are to be: H. E. Spencer, M. P., who will give his annual report on the past session at Ottawa; William Irvine, M.P., Mrs. A. H. Warr, U.F.W.A. President, Hon. R. G. Reid, J. R. Love, W. G. Farquharson and P. Ensmann, members of the Alberta Legislature.

The Anglican W. A. will hold a sale of Home Cooking and afternoon tea Saturday afternoon, June 29th at the home of Mrs. Yeund next door to the Masonic Hall.

Anglican Sunday School will be held on Sunday, June 30th at 11 A.M. in the Masonic Hall.

The regular meeting of the Irma W.M.S. was held at the home of Mrs. Jas. Fenton, on Thursday, June 26th. A large attendance was present, including visitors from Jarow. Besides the regular program, which included a synopsis of chapters 8 and 9 of the Study Book, very ably taken by Mrs. E. Simmons and Mrs. J. Carier, we listened to the report of the W. M. S. Convention recently held at Calgary, given by Mrs. S. Reeds. It is not often we have the pleasure of listening to such a report as Mrs. Reeds brought back from Calgary. Besides being intensely interesting, it was highly educational, as we heard the pit of all the addresses and reports, without the attendant statistical notes and figures, which are very necessary but sometimes rather dull and uninteresting.

We also had a paper read by Mrs. McFarland, on the day's topic, which was very cleverly written by Mrs. McFarland's grandfather, Mr. Oeshel, who is in his 89th year.

We then enjoyed a short address by Rev. Mr. McNeill of Jarow who stressed the point of pressing young people, particularly, into taking an active part in our meetings.

The meeting then closed to meet next on July 15th in the Church at Irma. A special program is being prepared for this meeting.

After one of the longest dry spells Central Alberta has had for some years the district was visited Tuesday night with some good local showers. While a lot of the early wheat has been seriously damaged by the lack of moisture the rain will help the late grain and feed situation. Should there be sufficient moisture to keep the grain growing till harvest the farmers will not be as badly situated as some of them have been thinking.

Several of the farmers who had stopped breaking on account of the dry weather are preparing to continue the getting ready of new land for next year if the wet weather continues.

VIKING

A. G. Andrews, M. L. A. addressed a public meeting in the Elks Hall last Saturday evening. He gave a review of the new proposed school act, the old pension act, and other measures of interest to citizens in general.

Questions were asked freely. Fred Hanson acted in the capacity of chairman. The new school act has many good points in its favor, and many not so favorable judging from sentiments expressed by several present. When questioned about the highways, the speaker stated that the minister had a plan all worked out for this year, and work was now progressing in many parts of the province.

C. G. Purvis is a business visitor in Edmonton this week.

A. T. Richardson, the new bank manager, arrived on Monday and has taken over the managerial duties at the local branch.

AVONDALE U.F.A. AND U.F.W.A. PICNIC & DANCE, WEDNESDAY, JULY 17th

Avondale U.F.A. and U.F.W.A. are holding a picnic and dance on Wednesday, July 17th. One mile west and three-quarters of a mile north of Paschenchale School. Mrs. A. H. Warr Provincial President of the U.F.W.A. will speak during the day. A line of sports is being arranged.

It is also expected Mrs. Mae Pickel and Mr. Aiken, U.F.W.A. and U.F.A. directors for Battle River will be present. A picnic lunch will be served during the afternoon to which everyone is invited to bring baskets and join in. Orbinde Orchestra will furnish music for a dance in the evening. Everybody come and enjoy the day and night.

Mrs. R. L. Shotts and daughters Margaret and Doris left on the 26th for a two months holiday at her old home in Ontario.

Avondale U.F.W.A. met at the home of Mrs. C. Johnson on June 26 with a goodly attendance. Committees for the picnic were appointed and a paper on Wills and Legal Status for women read. Mesdames Gray and Ballentine gave a report on the new program for the next six months now in preparation by the committee. Welcome guests were Mrs. Simpson (one of the new Hudson Bay emigrant settlers), Mrs. Everett, Mrs. Rogers and Mrs. Pollard of Autumn Leaf local and Miss Simonds of Battle Heights.

The beef ring of Roseberry and vicinity is progressing nicely and the members are enjoying their weekly allotment of young fresh beef. Mr. Cooper is handling the butchering.

Roseberry U.F.A. will hold their annual picnic Wednesday afternoon, July 17th, when everybody is invited to come and have a good time.

Funeral services were held on Sunday, June 23rd at the Norwegian church north of Lougheed and interment in the Norwegian cemetery. He was mourned by his wife and family and other relatives.

The residents of Diamond Willow district held a welcome dance in the schoolhouse on June 21st for the recent new settlers. A large crowd attended and a very good time was the result. After lunch the crowd was entertained by some step-dancing by Mr. Bert Travers, Mr. Pat Daly, and Mr. Somerville. Two little Welsh girls, Misses Thomas, recently arrived, gave a Welsh dance and the Charleston. Two other girls, the Misses Kathleen Leighton and Grace Anderson, also demonstrated the Charleston. Mrs. Leighton delighted the crowd with a sword dance. An address of welcome was given by Mr. R. Cormac, chairman of the school board. Music for the dance was supplied by Messrs. Leighton and Laidlaw who have recently taken up farming in this district.

Mr. and Mrs. Collier, son Bruce and daughter Miss Phyllis returned on Saturday after spending a week at Banff seeing the sights which they reported as wonderful. Bruce is returning to his position at Detroit on Thursday of this week.

A very pleasant surprise was given at the home of Mr. and Mrs. W. W. Kerns on Monday evening when seven cars carrying fifty seven friends arrived in a body.

After regaining their speech Mr. and Mrs. Kerns invited the guests into the house. After a couple of hours of social time, games and visiting, Mr. P. J. Wangness and Mrs. Jno. Scott carried two beautiful easy chairs into the living room and in Mrs. Scott's well chosen words they were presented to the bride and groom of a week. Again words could not be found by either Mr. or Mrs. Kerns to express their gratitude toward the community for their kind and loving remembrance. Refreshments were served at eleven-thirty after which the friends departed to their many homes, wishing the newly weds many happy and prosperous years in the future.

BRUSHING WANTED

Get your brushing done now when labor is cheap and plentiful and harvest a crop next year, call or write Hungarian Slovak Colonization Board, 10211-97th St., Phone 6404 and get a bid on the job.

Do these things and a happy, contented baby will be the result. For "Summer care of babies" send to the Canadian Red Cross Society, 407 Civic Block, Edmonton, Alta.

55 DEGREES IN THE SHADE AND BABY
It is 85 degrees in the shade as this is being written with every prospect of being warmer. Half an hour ago a young mother was giving her baby an airing in his buggy. Mister baby was far from happy and didn't mind letting everyone know it. Mother was dressed in a cool white sleeveless dress and wearing a shady hat. Baby was wearing a hot woolen close fitting hood tied under his protesting little chin. He was tucked tightly in to the buggy with several layers of blanket and on top of that a nice warm wooly shawl, and although they could not be seen, it is almost certain he was wearing woolen stockings. Comparing mother's warm day outfit with baby's, it is only wonder his protests were loud and long!

Baby feels the heat just as much as mother does and suffers more because he cannot make himself comfortable. He has to wait until someone else thinks to do it.

In the Summer heat baby's clothes should be the minimum. If a Mother has any doubt, let her slip her hand inside baby's clothes and if the little body feels moist then he is too warm. Cloth lightly and cover lightly so that the air may circulate freely over his skin. This keeps him cool. Give him cool boiled water between feeds. He gets thirsty too during hot days.

Do these things and a happy, contented baby will be the result. For "Summer care of babies" send to the Canadian Red Cross Society, 407 Civic Block, Edmonton, Alta.

NEWS ITEMS FROM KINSELLA

We are glad to report that Hagen, daughter of Mr. and Mrs. Fred Waltz who last week had the misfortune of being injured, has returned home from the Viking Hospital and is well on the way to recovery.

The cattle trial of C. H. Webb vs. Fred Green is being threshed out in the Edmonton courts today, June 21. An oil drilling outfit has arrived at Kinsella and preparations are being made to drill for oil about twelve miles north and east of town.

The many friends of Mrs. Herrick Sr. will be sorry to hear of her illness again. It will be remembered that Mrs. Herrick was confined to her bed last winter for a long time. Hopes are held out for her early recovery.

Preparations are now under way for a Picnic and Sports day to be held jointly by the Metropolitan and Lake Vernon schools on June 28th at Lake Vernon school. A dance will take place in the school house in the evening. Bring refreshments and let's all go.

The Women's Institute is holding a tea in the basement of the United Church at Kinsella on Saturday, June 29th. A special invitation is extended to the thirteen new families, that arrived here this spring under the Hudson Bay Coy's settlement scheme to come and get acquainted. This does not exclude for the day other patrons of the Women's Institute.

Mr. and Mrs. J. F. Murray are the owners of a Maytag Aluminum washing machine, purchased from Jno. J. Overbo, agent.

Mr. R. Bergsett has also bought one of the labor saving machines. Mr. John Larson passed away last week, after a short illness. Mr. Larson was well and favorably known, and with his family had been residing for many years, ten miles south of Kinsella. He was one of the early settlers of the district.

Funeral services were held on Sunday, June 23rd at the Norwegian church north of Lougheed and interment in the Norwegian cemetery. He was mourned by his wife and family and other relatives.

Automobile Accidents

The summer months of July and August undoubtedly witness the heaviest automobile traffic throughout Western Canada. It is during this period that tourist traffic is greatest with “foreign” cars in large numbers from other Provinces and the United States crossing and re-crossing these prairies. They come from Provinces and States where traffic regulations frequently are different from those in force in these Western Provinces. During this mid-summer period, too, what we may term “domestic” traffic is at its peak. Roads are at their best, and following the closing of the schools many of our people tour “en famille,” while week-end journeys to summer resorts are much in vogue.

While care in driving is at all times necessary, and with the steady increase in the number of cars in use is becoming a more and more real matter, it is nevertheless the case that during these summer months extra care should be taken.

There are certain factors to which special attention should be paid, and the importance of which are reinforced as a result of careful investigations into the cause of auto accidents carried out during a period of years. For example, one would naturally suppose that the majority of such accidents occur on bad roads, at intersections, curves, etc., but statistics prove that the majority of accidents occur on the so-called “safe” parts of the highways. Apparently drivers are careful on curves and badly surfaced roads, and let themselves go on straight, smooth stretches.

Statistics compiled in the State of Iowa in regard to accidents are certainly illuminating:

10,666 accidents occurred on straight-away stretches where the drivers of the colliding cars had a clear view of the objects with which they were colliding.

7,385 occurred at intersecting roads, most of which were due to the fact that one or both vehicles approached the intersections at speeds too great to be checked upon perceiving the approach of the second car.

1,596 were caused by failure to grant the right-of-way at street crossings.

910 occurred on curves, caused by the drivers of the two vehicles going in opposite directions “hugging” the “inside” of the bend in the road to help them maintain high speed.

1,169 resulted from driving on the wrong side of the road.

117 were caused by cutting corners.

1,788 were caused while ascending and descending hills.

The roads were in the following conditions:

15,460 roads were good; 563 were rough; 3,196 were wet; 482 were covered with snow; 1,015 were icy; 181 were sandy; 51 were muddy.

These figures seem to fairly establish the fact that the better the roads, the greater the number of accidents. In other words, where roads are not good, drivers are forced to exercise care, and because care is exercised accidents are reduced to a minimum notwithstanding that conditions existing would naturally predispose accidents, but where roads are good, drivers become careless, even reckless, and sooner or later, the inevitable result is an accident.

With the present insistent demand everywhere for more good roads, and a still higher standard of good roads, coupled with the increasing power of cars and their enormous increase in number, the accident toll on highways is mounting higher and higher. The cause is the very reverse of what might have been expected. It is not defects in car manufacture, because cars themselves are stronger than ever before. It is not road conditions which presumably might ditch a car, overturn or damage it.

No, it is the human element that is responsible for the mounting toll of accidents. Instead of reaping the benefit of the vast improvements being made, drivers are becoming more and more careless, taking ever greater chances, becoming less considerate of the other fellow's rights, determined to secure “speed” at all hazards.

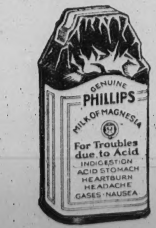

Think it over the next time you are tempted to “step on the gas” for the sole purpose of seeing and boasting of what your car can do. It may do something you least desire and will forever regret.

Help Yourself

Help yourself and the world will not treat you very badly. Helping yourself means thinking, knowing your job, and having other interests as well. It further means cultivating your brains by reading and learning something new. You will find plenty to occupy your time and thoughts, and thus you will never feel bored or dull.

Busy At Eighty-Two

At the death of 82, of Mrs. Flora Annie Steel, the great novelist of India, at Springfield, England, recently, she had just finished her autobiography, had half finished a novel, and had just published another, “The Curse of Eve,” which gave her views on social problems.

When Pain Comes

What many people call indigestion is very often means excess acid in the stomach. The stomach nerves have been overstimulated, and food sour. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much excess acid, and the symptoms disappear at once. You will never use crude salts, soda when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

Work On Branch Line To Mine

Commence Laying Steel On Line To Sherritt-Gordon Property

Commencement has been made on the laying of steel on the branch from Cranberry Portage to Sherritt-Gordon.

According to information, a very large gang under Peter MacKenzie, started laying the rails on the 55 1/2 mile stretch. Work will be rushed on the steel laying and it is anticipated that trains will be running into Cold Lake by September 1st.

The opening up of the Cold Lake branch will see active development on many mining properties lying between Cranberry and Cold Lake.

NERVE TORTURES

A Condition From Which Both Men and Women Suffer

Hardly any condition of ill health causes more real suffering than a “nervous” system. And often, unfortunately, but little sympathy is shown for the sufferer, from the mistaken notion that the nerves can be controlled. Men and women with nerves out of gear often become irritable and are blamed for ill temper. When it is their fault, the poor health is the cause. The tired, over-lazy wife and mother, whose household cares have worn her thin; the breadwinner, whose anxieties have worried him until he is really ill, are among the nerve sufferers who become run down. Their nerves, like all bodily organs, need rich, red blood. In all such cases the best and simplest treatment is a course of Dr. Williams' Pink Pills, which enriches the blood and builds up the nervous system and brings good health and cheerfulness. Mrs. M. Cross, Richmond, Que., tells how Dr. Williams' medicine cured her nervous troubles. She says: “I have suffered from nervousness and dizzy spells, and the hundred and one things which in such a condition make life a misery. The first thing I found to help me was Dr. Williams' Pink Pills. Under the use of this medicine I found my nerves grew steeper, the dizzy spells grew less frequent, and I became brighter and more cheerful. I took the pills for some time and found that they enrich the blood, build up the nerves and are a fine medicine for both old and young.”

You can get these pills through any medicine dealer or by mail from Dr. Williams' Medicine Co., Brockville, Ont.

Five Points For Britain

Gas-Designed, Equipped and Operated Fastest Motors Of Travel

It is certainly a most remarkable fact that at this moment the fastest motor in the world (the airplane which won the Schneider Cup), the fastest craft on water (Miss England), the fastest motor car (the “Gold Arrow”), the fastest passenger liner (the Mauretania), and the fastest locomotive (A. G. W. R. Express), are British all five—British, designed, equipped, and operated. We are glad that the British government's exhibit at the Toronto National Exhibition this year will show five models to remind the world of it.

Cramps Diarrhoea Pains in Stomach

Mr. Roy Lighthall, Milford, Ont., writes: “I became very ill; lost my appetite, had cramps, diarrhoea, and severe pain in my stomach.”

“I purchased a bottle of Dr. Fowler's Wild Cherry Syrup, and before I had taken half of it, I was completely relieved, and have had no symptoms of the trouble since.”

“I cannot praise the ‘Extrait’ highly, and will never be without a bottle of it in the house.”

“It is pleasant to take and acts very quickly.”

“My brother had the same experience with it as I had.”

“Dr. Fowler's” has been on the market for the past 84 years; you don't experiment when you buy it. Price 50 cents a bottle at all dealers; put up only by The T. Millburn Co., Ltd., Toronto, Ont.

Wheat Pool Elevators

When the three provincial units of the Canadian Wheat Pool have completed their 1929 building programme they will be operating a combined total of 1,068 country elevators with a capacity of from 30,000 to 40,000 bushels each. Of this number 1,055 will be in Saskatchewan, 390 in Alberta, and 163 in Manitoba.

For sunburn—apply Minard's Liniment.

It is complained that many business men write illegibly. A really busy man, of course, has not time to be constantly consulting a dictionary.

One of the commonest complaints of infants is worms, and the most effective application for them is Mother Gray's Worm Expeller.

Britain Has New Industry

Factory In London, England, Makes Starless Four From Beans

A factory now completed in North London, marks the beginning of a new British industry which will not attain the importance acquired in recent years by sugar beet or even artificial silk. There flour will be made from soya beans, whose acknowledged nutritive value has now, it is claimed, been made consistent with digestibility.

The soya bean is nearly all protein and fat, and it is devoid of the starch to which dyspepsia is commonly attributed. In protein it is four times richer than the best wheat, in fat twenty times richer.

In taste it reminds one of the almond, and bread containing it keeps longer than the ordinary bread. The probability is that it will be used also, as in Austria, for biscuits and confectionery, and the making of a new kind of chocolate.

Cars For Bolsheviks

Stated That Henry Ford Will Produce 900,000 Autos For Soviets

Henry Ford is to produce 100,000 cars a year for Soviet Russia under terms of a contract signed recently and made public in New York.

The contract will run for nine years and two factories will be established in Russia. Only the Ford passenger model “A” and the Ford truck model “AA” will be manufactured. More trucks than passenger cars will be produced.

The factory is to be located at Nizhni Novgorod, on the Volga river, and will be completed within four years.

For Burns and Scalds.

Dr. Thomas' Electric Oil will take the fire out of a burn or scald. It should be applied immediately, so that it may be available at any time. There is no preparation required. Just apply the oil to the burn or scald and the pain will abate and in a short time cease altogether.

New Picture Film Invented

Can Be Made Of Cloth and Is Washable

The housewife of the near future may say to her servant: “Bridget, put those photos of father in the wash and hang them on the line to dry. Be sure to iron them tomorrow, for he is coming on a visit and I want them to look nice and fresh.”

Exactly that can be done with a new kind of picture film invented by Dr. R. W. Hochstetter, head of the Hochstetter laboratories.

He is not using the invention for household purposes, but instead is applying it to produce new types of motion picture films, and radio transmission of sound, photos and motion pictures. Several new processes are involved.

The first is making photographic film out of cloth, so that it is washable, ironable and non-inflammable. He says that cotton, silk, linen or even paper can be used.

Along with the new film Dr. Hochstetter announces invention of a process for reflecting sound and pictures from the face of the films, instead of transmitting light through film. He also has a different method of amplification of sound, to get further away from distortion.

The use of Miller's Worm Powders insures healthy children so far as the ailments attributable to worms are concerned. A high mortality among children is traceable to worms. These sap the strength of infants so that they are unable to maintain the battle for life and so die. This preparation gives promise of health and keeps it.

Better Study Geography

The Saskatoon Star-Phoenix received a letter from the assistant editor of the National Geographic Magazine, Washington, D.C., in which reference was made throughout to “Saskatoon, British Columbia.” If all the other information published in National Geographic is equally as accurate as the above, it is no cause for wonder that the Americans picture Canada only as a land of ignorance and a country of beer mugs and plus-fours.

Keep Minard's in the Medicine chest.

Machinery For Shearing

Hand Clippers Used In Australia Only On Pedigree Sheep

Australia's wool clip this season is estimated at about 900,000,000 lbs. from about 100,000,000 sheep. The great bulk of the shearing is done by machinery, although, in the case of pedigree sheep, hand-clippers are generally used to ensure a cleaner and more even cut. Wolseley, who invented the shearing machine, went to Australia from England in the middle of last century. He took up sheep farming soon after his arrival, and brought his first patent in 1874. With the machine shears now in use, an average worker can cut 100 fleeces per day, and totals up to 200 are fairly common.

Ambitious Project

Plan To Pipe Gas From Alberta As Far East As Winnipeg

W. S. Herron, oil operator, announces that a plan for piping gas from Alberta to Winnipeg, serving also Regina, Moose Jaw and Saskatoon, is under consideration. He says that the cost would probably be \$30,000,000 and that eastern Canadian and U.S. capital is interested.

After 10 Years Of Asthma Dr. J. D. Kellogg's Asthma Remedy proved the only relief for one grateful user, and this is but one case among many. Little wonder that it has now become the one recognized remedy on the market. It has earned its fame by its never failing effectiveness. It is earning it today, as it has done for years. It is the greatest asthma specific within the reach of suffering humanity.

May Have No Thrills

Nothing is really attractive unless it has the element of risk. This makes one look to the future with melancholy. Every day things are being made safer and safer. Even aviation some day will be safe and sane. The sea is getting safer yearly. The risks of railroading are diminishing rapidly. What will our grandchildren do for their thrills?

Corps are caused by the pressure of tight boots, but no one need be troubled with them long when so simple a remedy as Holloway's Corn Remover is available.

The Helpful Wife

Sporting Goods Salesman “Something in golf madam?”

Lady: “I want to see some large-sized handbags, please. My husband says that if he has a large enough handbag for tomorrow he'll win the game.”

For Frost Bites and Chilblains.

Chilblains come from undue exposure to slush and cold and frost-bite from the icy winds of winter. In the treatment of the above, it is interesting to point out that American money last summer was at a considerable discount but the merchants here accept the money at par and paid the discount themselves at the bank. This was courtesy, also good business.

Mapping By Photography

The camera has been used by the Topographical Survey Department of the Interior, as a means of gathering topographical data in the field for mapping purposes, for the last forty years.

Minard's Liniment for sick animals.

The amusing part of it, says the Farmer's Advocate, is that some of those city fellows who know how a farm ought to be run, plant a bag of potatoes and harvest a bushel.

6 Suggestions

Make Your Farm More Comfortable, More Livable and More Profitable with These Simple Spare-time Improvements

If you have any time on your hands here are six suggestions which will make an amazing difference in the attractiveness and efficiency of your farm.

First—Buy a supply of Gyproc Fireproof Wallboard. Then erect Gyproc partitions in your attic, changing the waste space into an additional room or two. Imagine how much more comfortable the family will be with the attic converted into a clean, inviting nursery.

Second—Renovate the lower rooms by nailing Gyproc right over cracked and faded walls. You can decorate the flat, smooth Gyproc surfaces with Abatstone, paint or any other finish. And what a difference it will make to your home.

Third—Line your garage with Gyproc. Gyproc will make it fire-proof, cold resistant and a safer, more substantial home for your car.

Fourth—Gyproc your poultry house. Your flock will have better health, and year-long protection from fire, cold, heat and vermin.

Fifth—Line your grain-bins, barns, stables and other buildings with Gyproc. By doing so you will make them more valuable, fire-safe, cold resistant and 50 per cent. more healthful for your stock to live in.

Sixth—Look about for cracked, warped or rotted walls, partitions and ceilings and repair with Gyproc. Such repairs are quick and inexpensive to make and because Gyproc saves, nails and cuts so easily—saving time and labor.

CANADA GYPROC AND ALABASTINE, LIMITED

Branches: Montreal, Toronto, Windsor, Winnipeg, Vancouver

Development of Highways In the Three Prairie Provinces Presents Difficult Problems

Before the end of 1929 there will be between four and five thousand miles of permanent highway in the prairie provinces. The problems connected with road building on the prairies have not been few. In the first place, the area to be served with even the most ordinary roads, was so immense. One of the first efforts of a community is to cut out a road connecting it with town and school and during the pioneering years there is little further work done. Possibly a few logs are laid across a water hole and some dirt thrown over. The technical name for this sort of road is "corduroy," the reason is obvious and one's sensibilities are "touched" by the corduroy road, whether manoeuvred by human wagon or motor car.

But with the increase in motor cars, and the consequent increase in motor travel, there was an insistent demand for better roads, roads that would be possible in all sorts of weather. It costs time and money to be held up for several days or weeks waiting for the roads to dry, so motorists, whether on business or pleasure bent, require all-weather roads.

Before the days of Government highways, and when all roads were under the jurisdiction of the municipal councils, some municipalities with a "forward disposition" made better roads than others. Some even put gravel on well graded and well drained surfaces, and so here and there would be a short stretch of permanent road. But the next municipality might have a council not interested in permanent roads, or, if so, wanted a road that ran north and south rather than one which crossed east and west connecting up with the road built by municipal "A." So these odd bits of good road helped not at all in the highway development of the province. It had to be a provincial government undertaking and a provincial plan, and an impetus was given by the grant offered to the provinces by the Government, based on the standard of road. So an effort has been made to overcome the difficulties of readmaking in situ, suit in one place, or wheat growing, gumbo in another, or forest covered areas with countless rivers to cross in another, and the result will presently be a gravelled highway from Fort William to Vancouver through the southern parts of the provinces and a road from Winnipeg northwest to Jasper, and some day on to Prince Rupert and down to Vancouver, making a huge triangle that will tap all the cities of Western Canada.

At present there are north and south gravelled highways from Emerson to Winnipeg, and then north to Lake Winnipeg; a road from Edmonton to Calgary, south to the International Boundary, and north to Athabasca Landing, to which the Athabasca River makes a big southern sweep before passing north again toward its ultimate goal in the Arctic Ocean. There its waters finally empty after some twenty-five hundred miles of wandering through and around mountains, past miles of forests and millions of tons of tail sands which some day will provide the covering for all weather roads throughout the prairies.

Already the traffic is so heavy on some of these prairie highways that the governments are worried over the necessity of incurring further capital expenditure for asphalt roads, since it is an economic fact that when the traffic exceeds a certain number of cars a day, it is more economical to have paver roads than to pay the cost of upkeep on gravelled roads.

Each province has its own road policy, but in each the effort is to provide all-weather trunk highways which are of the best use to the people living within the province as well as to the tourist and also provide good market roads for those who have made their homes within that province. Each is groping for some system of conserving gravel highways, and each is hesitating over the

tremendous capital expenditure of paving. But so universal is the traffic on Western Canada roads that if some of these oil schemes do not prove themselves shortly, it will be necessary to pave.—Montreal Herald.

Might Work Another Way

Canada's Attitude Toward Titles Should Apply To Honorary Degrees

One Canadian university which in past years has been decidedly free with honorary degrees announced that it would confer none in June of the present year, wherefore many people of the Dominion will feel constrained to break into loud applause. Knighthoods have been abolished in Canada, and it is high time that Canadian universities ceased creating any more LL.D's. Of course there are knighthoods that would be approved on all sides, just as there are honorary degrees that would commend themselves to everybody, but the trouble is that both the King's advisers and men at the head of universities have often shown a want of discrimination.

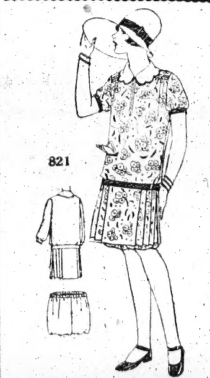

Not Becoming Wealthy

So Far Linbergh's Official Position Has Netted Him Nothing

Charles A. Linbergh is not getting rich very fast from his position as adviser on aeronautics to the Department of Commerce. Assistant Secretary MacCracken and Linbergh has not drawn one cent in salary since his appointment about five months ago.

He is allowed \$25 a day when his services are sought by the Commerce Department. Otherwise he gets nothing. MacCracken explained that no problem had arisen which required Linbergh's advice.

Winnipeg Newspaper Union

SMART BLOOMER DRESS

Printed linen takes its place in the mode and is used for a most unusual bloomer dress for the growing miles of 6, 8, 10, 12 and 14 years. The back of gown extends over shirred front, forming yoke effect. The short puff sleeves are a new style feature. Collar can be made in plain or scalloped outline. The attached two-piece skirt with smartly pressed plaits, allow plenty of freedom for the activities of youth. Pattern No. 821 consists of dress and bloomers. For the 8 year size, it requires 2 1/2 yards of 36-inch material with 1/2 yard of 18-inch contrasting. Printed sateen, chambray, tub silk, cotton broadcloth, checked gingham, printed crepe de chine and printed cotton foulard also smart. Price 25 cents in stamps (wrap coin preferred). Wrap coin carefully.

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Spring Fashion Magazine. It's just filled with delightful styles, including smart ensembles, and cute designs for the kiddies.

How To Order Patterns

Philanthropist

W. H. Askew, wealthy Laird of Langhalk, near Berwick, who is devoting large sums of money for the purpose of enabling worthy British to come to Canada in agricultural placement, arranged by the Department of Colonization and Development, Canadian Pacific Railway. "Make good," said Askew to a large group of colonists whose movement he made possible, "and you will be giving me all the thanks I ask."

Trying To Develop Hardier Strawberries

Plant Breeders Are Now Turning To Wild Variety

All the strawberries in Canada and the United States and most of the world that is the cultivated ones are descendants of two wild strawberry, one a native of the Pacific Coast, and the other a native of the eastern United States.

There are many other wild strawberries, however, that did not take part in developing our present kinds. In the untamed wild one may lurk some valuable trait that can be bred into our domestic varieties which may make them even more desirable than they now are. At any rate, plant breeders are turning to the wild sorts for improving the strawberry, especially to develop new types better adapted to such specific purposes as canning, preserving and candy making.

A Long Story

Don't get impatient if you find serial stories in newspapers and magazines rather long. Suppose you get interested in "The Mountain Pass" and wanted to finish it. This historical novel by Nakazato Kusan is now running for 13 years in the Miyako, a Tokyo newspaper, and the end is nowhere in sight. Up to date the story fills 25 volumes.

Would Care For Blind

The Manitoba government is anxious to have the old age pensions act extended to blind persons needing assistance. Hon. W. J. Major, attorney-general of that province, urged the extension on Hon. Peter Heenan, minister of labor. Mr. Heenan promised sympathetic consideration in Ottawa.

Educational Films

Excellent Films Supplied By the Government Should Be Shown

As for the other matter, the type of moving pictures presented to Canadian audiences, an interesting and valuable suggestion is made—namely, that the excellent films in possession of the governments—Dominion and provincial—which are at present available for exhibition in the schools, should be shown also to the general public. Whenever there is a suggestion of "educational" films, the answer is always made that the producers and theatre managers are catering to popular taste—that it is a case of supply and demand. But there is little doubt that the appetite for low-grade pictures grows by what it feeds on. The sentimental, nauseating rubbish which is served up to patrons has a vitiating effect, especially on immature minds. The suggestion made by Col. C. B. McCullough, that one of the local school authorities might be engaged for a weekly showing of these interesting government films has much merit; it should, at any rate, be possible to make suitable arrangements. (Hamilton Spectator.)

Stubble Burning Warning

Extra Precautions To Be Taken Against Spread Of Fire

Exercise care in stubble burning. Burning fires cause damage to the property of others. This is the tenor of a province-wide educational campaign which has been instituted by the Fire Commissioner of Saskatchewan in an attempt to reduce the fire losses from stubble burning which have been abnormally high during recent years.

The Prairie and Forest Fires Act requires that the stubble to be burnt must be completely surrounded by a fire-guard not less than 20 feet in width, and the fire must be guarded by three adult persons. This law, in the future, is to be more stringently enforced.

Where combines or tractors have been used and the stubble is longer than ordinarily, the Fire Commissioner warns, extra precaution should be taken.

Finds Ivory In Yukon

Most ivory hunters go to Africa and shoot elephants, but Jack Elliott seeks his prize in the valleys of the Yukon, and the tusks and bones he finds there belong to animals that have been dead for thousands of years. Elliott went into the Yukon when the first flush of the gold excitement had faded. He did not find gold, as hundreds of his predecessors had failed to do, but he did dig in the creek beds and he found another treasure there.

Prodigal—Father, I've a notion to settle down and go in for raising chickens.

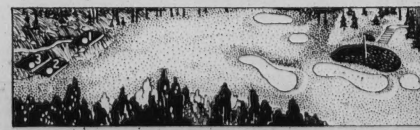

Father—Better try owls. Their hours would suit you better.

The best way to avoid tire troubles is to ride in a friend's car.

SHORT BUT TRICKY

This hole on the Jasper Park Lodge Golf Course, Jasper National Park, Alberta, over which the Canadian and Western Canada Amateur Championships will be played from Aug. 19-24 this summer, is more difficult than it seems. The green is well trapped and the long driver is sure to find trouble.

The fact that the Western Canada Amateur also takes place over this course at the same time as the Dominion event, assures all golfers, no matter how high their handicap, of lots of competitive play.

The photograph shows the hole from No. 1 (championship) tee, and the panel is the hole in detail, with yardages to scale below it.

Believed Fort Norman Region Offers a Great Oil Reserve Which May Be Used in Future

Closely Connected With

Agricultural Market

People's Greatest Hotel Will Buy Bulk Of Supplies In Canada

That the erection of the tallest building in the British Empire should have any direct connection with the market for Canadian agricultural and food products of the highest quality is something not directly apparent on the face of it. The tallest building in the Empire is, however, also the Empire's greatest hotel, the Royal York, in Toronto, which was recently opened. The Royal York's annual bill for foodstuffs will be in the neighborhood of \$750,000, the great proportion of it to be spent in Ontario or the Dominion as a whole.

Live lobsters will come from the Maritimes in special crates three times a week. Salmon from the Saguenay is already ordered. Hundreds of gallons of the finest Canadian maple syrup will be used in the creation of special Canadian dishes. A supply of millions of ultra-fresh eggs is secured. Canadian beef and lamb, selected on the hoof, can be equalled nowhere else. Canadian fruits and vegetables will be brought from various sections of the Dominion famed for their own particular output. As a matter of fact, a pains-taking survey of Canadian delicacies has been made on behalf of the new hotel with the idea of bringing out dishes and produce to the attention of many thousands of visitors annually. Investigation has shown how surprisingly few materials have to be imported even to cater to the fastidious taste of the gourmet who has eaten excellently in all parts of the civilized globe.

Investigate Clay Resources

Survey To Be Undertaken In Saskatchewan This Season

Survey and test of the clay and other non-metallic mineral resources of Saskatchewan, conducted during recent years by Prof. W. G. Worcester, of the Ceramics Department, University of Saskatchewan, under auspices and direction of the Mineral Resources Department of Railways, Labor and Industries, will be continued during this summer.

A tentative programme of investigation, exploration and test already has been prepared for the summer's work. This calls for a brief reconnaissance survey along new branch lines of the Canadian Pacific Railway in the Wood Mountain district, whence samples of clays, bentonite, and volcanic ash will be taken. That work completed, a more rigorous survey in the Cypress Hills area probably will be undertaken. The oil signs in this area attracting to it special attention, while it is also proposed to investigate the clays in the white mud beds of the Frenchman River.

The programme as outlined envisages a survey of the non-metallic materials in the more favourable districts of Northern Saskatchewan, to which attention is directed by the possibility of early railway transportation. The Rottenstone Lake and Lac la Ronge areas will be covered, as also will the territory which the proposed railway line will traverse.

Atlantic Coast Not Sinking

The old question of whether the Atlantic Coast is sinking into the sea is said to be settled once and for all by the final report of a group of geologists who have been studying the problem for a period of years. According to results of the investigations, the stability of the coast has been established. Scientists from time to time have predicted that New York City some day would sink into the sea, and theories have been debated among geologists for years.

Real Old Timer

Arriving in the Edmonton District in 1877 from Deschambault, Que., Alfred Arcand purchased a 288 acre farm for a cayuse and saddle. Mr. Arcand has just celebrated his 79th birthday. He is a veteran of the Royal North West Mounted Police, and is still living on the farm which he purchased from the halfbreeds in 1880 for the consideration mentioned.

First Artist—Old Roxley wouldn't buy my pictures—wouldn't even look at them.

Second—Ditto—Well, he was more considerate of your feelings than of mine—he refused to buy my pictures even after he looked at them.

A small "cracking" plant of sufficient capacity to distill gasoline for the motor boats which ply the MacKenzie River during summer may be built this summer a short distance from the Arctic sea.

The Hudson Bay Company boats which leave McMurray and Fort Smith on their voyage down to the Arctic may carry the nucleus of this refinery. The company has investigated the feasibility of taking such a plant into the high north, and it is held probable that within the present year crude oil from Canada's highest north oil field will be supplying gasoline and other fuel for the various shipping and other operations in the north.

Just before the war the late Dr. T. O. Bosworth, well-known British geologist, visited the far north, making his way down the MacKenzie to the Arctic. He came back with news of possible oil structures near Fort Norman. Then came the war and it was not until 1919 that the Imperial Oil Limited, sent in a crew with a light drilling rig. As may be imagined, the transportation problem into this country was daunting.

On what was afterwards known as Discovery Range, fifty-three miles north of Fort Norman, the crew drilled the first well to a depth of 520 feet, at which mark they struck oil sand with a gas flow. This well flowed in "heads" or spasmodically when enough pressure collected to force the oil to the surface.

Rumors floated up the river to the south of the field was started, men making their way in even during the winter months. The well actually did increase production to about 100 barrels of high grade crude oil after being deepened.

Imperial Oil Limited, pushed its development work with enthusiasm, and kept sending in new rigs and material over the 1,400 miles of wilderness between Edmonton and Fort Norman. One season they used airplanes to help them with their communications. In one season freight bills alone amounted to \$140,000.

Several dry holes were abandoned at other points along the river, but Discovery No. 1 increased production and Discovery No. 2 was drilled.

It is the opinion of many oil men that the Fort Norman region offers a great reserve of oil on which Canada may draw in the future. With mining development pushing towards the Arctic, it is not too much to predict that before many years ways and means will be found to bring the Arctic petroleum to market.

Fort Norman oil is 35.6 degrees Baumé gravity, with paraffin base and is extremely high in gasoline content. It remains fluid at 90 degrees below zero, having a natural temperature of 12 degrees above zero Fahrenheit.

Must Work On Roads

Every man in Jugoslavia must give his services for six days in every year for road making, according to a new Government decree. Owners of auto trucks and horse-drawn wagons must lend their vehicles for three days each year. According to Premier Jivkovich, the country's most pressing need is a first-class modern system of roads.

MORE NORSEMEN FOR THE WEST

This photograph was taken at Winnipeg after the arrival of the first immigrant special train this season, over the Canadian National Railways, March 20. There were 205 broad-shouldered Scandinavians in a total of 369 arrivals, which included 22 British settlers. Two trains, which followed the first special a day later, brought the total of newcomers up to nearly one thousand. At least half were Scandinavians. All the immigrants have been placed by the Canadian National Railways' colonization department.

It's Better to Buy at Home

Sports Day Will Be A Hummer

(From the Viking News)
Some of the attractions at the Viking Sports, July 1st, Monday.
Baseball—Viking vs Irma, and another team not yet named.
Football—Phillips, Rutherglen and Viking teams.

Basketball—Men's Bruce, Birch Lake, and Viking.
Basketball Ladies—Viking and Phillips teams.

Basketball, Juniors—Mooreville, Rosegarland, Phillips, and Viking.
Elks Carnival—The World's Best.
Horse Races—Running and Trot.
Foot Races—For all ages.
Athletic Events—of all kinds.
Music—by the Viking Band.
Horseshoe Tournament—Open to the World and part of Texas.

Treats for the Kiddies—by the Elks.
Many Other Attractions—too numerous to mention.
Ice Cream, Eats, and Hot Dogs.
Cars and Grandstand—Free.
Picture Show—3 to 5 P. M. and 7 to 9 P. M. New management.
Grand Dance—Jensen's Hall, after the show, at 9:30 P. M.

Crack up the old Liz—and come. Admission—Adults 75c. Children over ten 25c; the rest free.

The United Church hall was the scene of a lively and highly original entertainment on Thursday afternoon when the Women's Institute entertained the grandmothers of Viking and Kinsella Women's Institute. Business was quickly dispensed with, after which Mrs. Hyslop, who was Viking's delegate to the provincial Women's Institute convention lately held in Edmonton, gave a condensed but graphic account of the four days' convention activities which was much appreciated.

Mrs. J. Scott, president of the Kinsella Institute was then called on and in her usual pleasing manner extended greetings to Viking Institute and voiced the pleasure of fifteen Kinsella ladies who were present.

The modern grandmothers then proceeded to carry out the presentation of a highly varied program. Recitations by Lenora Leeder, Mrs. Gares, Mrs. George Hopkins, and a reading by Mrs. Hammel were interspersed by community singing. Then the flapper grandmothers produced a sonburst drill, worthy of the most up-to-date vaudeville, and the mirth caused by this did not cease to make itself heard until tea, the crowning event of the afternoon, caused even the grandmothers to turn their attention to serious matters. Nor will the day soon be forgotten, for each of the twenty-two grandmothers present received a note to hang on her wall. Moreover eighty women will remember a pleasant afternoon. During the tea hour Miss Florence Gillespie sang very sweetly, "The Old Wooden Rocker."

The Country horse shoe pitchers again defeated the Main Street champs in a tournament held at the farm of Mr. H. E. Gares fourteen miles northeast of town Monday evening. With twelve men to a side, eight games were played, and when the score was totaled up, the Country boys had 728, while the city fellows had an even 700. A fine pitching ground had been prepared by Mr. Gares, who also acted as host with a tasty lunch of hot coffee, sandwiches and cake. Another tournament is planned to be held at the farmhouse of Mr. A. A. Long.

Messrs. T. H. Metcalf and Chan Collins arrived from Edmonton on Monday and have rented a residence on Fifth Avenue. They are the new proprietors of the Viking Movies, and will show their first picture "The Patriot" on Monday, July 1st, two performances, first show from 3 to 5 p.m. and second from 7 to 9 p.m. After July 1st they will endeavor to have picture shows every Friday and Saturday evening.

Mr. Metcalf was up until a few weeks ago organist at the Capitol theatre, Edmonton, and Mr. Chan Collins, is a well known violinist, having appeared on C.J.C.A. radio programs. He is prepared to take a number of violin students, and Mr. Metcalf take a class of piano and organ students. Mrs. Collins is also prepared to give lessons in voice.

The Viking Elks are holding a decoration service at the cemetery on Sunday, June 30th, at three o'clock, when the graves of deceased brethren and friends will be decorated with flowers.

The Elks will meet at the hall at 2:30 P. M. and proceed to the cemetery in cars. A short service is being arranged.

The general public is cordially invited to partake in the decoration and service.

The band will play.
Printed song service sheets supplied.

Dr. Richardson, dentist, will be away from town on business for a week following July 1st.

PURE BRED CHICKS

Many of the highest record Pure Bred flocks in Western Canada supply us hatching eggs. These flocks are carefully culled and selected and selected. P. W. Abbot, Man. Director. E. L. Holmes, Sec.

Noxious Weeds

Are unsightly in fields and gardens and along roadsides.

Rob the soil of valuable plant food.

Occupy space which should produce grain.

Reduce the grade of the threshed crop.

Cost money to thresh, haul and ship to market

Entail heavy losses in dockage.

The first week in July has been designated as

Weed Week

and a special campaign urging the eradication and control of noxious weeds will be conducted.

Watch for articles in the press and for announcements of meetings and radio addresses.

Published by a committee representing the —

Alberta Seed Growers' Association,
Alberta Advisory Weed Board,
Alberta Department of Agriculture.

To Meet Your Wishes

Your U. G. G. Elevator is there to handle your Grain for you as you want it handled.

And whether you deliver your Grain by cash ticket, for storage or for shipping, you are sure of the best possible service.

Deliver your Grain to —

UNITED GRAIN GROWERS LTD
ELEVATORS AT VIKING, KINSELLA, IRMA, JARROW.

NEW C.N.R. HOTEL FOR VANCOUVER

The finest hotel on the Pacific coast is now under construction in the heart of Vancouver for the Canadian National Railways. The excavation for the foundations has been completed and the steel contract awarded and work will be pushed vigorously until the hotel is ready. This fine building, which will occupy a prominent place in the downtown section of the city, will be known as The Canadian National Railways Hotel. It will contain five hundred bedrooms and will be wholly modern in all its facilities. Particular attention will be paid to banquet and convention hall facilities. The photograph shows the architect's conception of the new hotel as it will appear when completed.

ALBERTA FAIR DATES 1929

Irma — August 13-14th.
Minburn — Innisfree — Ranfurly, August 8-9th.
Viking — August 15-16th.
Wainwright — August 6-7th.
Camrose — July 25-26-27th, V. E.
Mannville — August 13th.
Forster, Camrose.
Vegreville — July 29-30-31st, Jas. McCrea, Vegreville.
Vermilion — August 1-2-3rd, W. E. Sutton, Vermilion.
Lloydminster — August 5-6-7th, H. Huxley, Lloydminster.
Strome-Killam — August 2-3rd.
Chauvin — August 8-9th.
James River & Eagle Valley Aug. 22
Kilcely — August 14th.
Kitchener (Greencourt) — Aug. 9th.

E. L. Richardson, Calgary.
Edmonton — July 15, 16, 17, 18, 19, and 20th, Miss E. L. Holmes, Ed.

COMMUNICATION

I beg to advise that Weed Conferences will be held on the following dates commencing at 10 A. M.
Clareholm, School of Agriculture, June 28th.
Raymond, School of Agriculture, on June 29th.
Olds school of Agriculture, July 3.
Drumheller, July 6th.
Vermilion, School of Agriculture, July 10th.
The public is cordially invited to attend any or all of these conventions. We trust that Councils and Weed Inspectors will be well represented. We would appreciate your giving publicity to these conferences and encourage people to attend.

W. J. Stephen,
Field Crops Commissioner

WORLD HAPPENINGS
BRIEFLY TOLD

Newfoundland's recently authorized \$40,000,000 five per cent. loan was awarded to the Bank of Montreal on a bid of 96.25. The government regarded the terms as favorable.

Prince Charles, second son of King Albert, was fined 100 francs (about \$11) for not voting in the Belgian provincial election in accordance with Belgian law.

Caught between a conveyor and a mixer in the Flin Flin mine plant, Jacob Holt was dragged to his death. His clothing became caught in the bucket-carrying device when he was working about the machine.

Some early moves looking to reduction of international naval armament are confidently expected in informed circles at Washington, to be made by the United States and Great Britain.

The Ontario Government's agreement with the Federal government on old age pensions was formally signed by Premier G. Howard Ferguson, and Hon. Peter Homan, federal minister of labor. The act becomes operative November 1.

One of the largest diamonds found in the South African fields was recently brought to Kimberley from Barkley West for valuation. It weighed thirty-three and one quarter carats and sold for \$12,700. This is believed to be a record price per carat \$300.

Baking tests of "carnet" wheat, shortly are to be carried out in the United Kingdom, and will be observed by L. H. Newman, Dominion cerealist, who leaves, from Montreal, on the Montrose. Mr. Newman may also go to Hamburg and other European grain markets.

Channel Tunnel Plan Favored

Would Help To Solve Unemployment Problem In Britain

Construction of a tunnel under the English Channel to connect England and France by rail is one of the schemes which Mr. H. H. Thomas has his eye on. In connection with his plans to solve the British unemployment problem, Mr. Thomas has been delegated by the new premier, Mr. H. H. Ramsay MacDonald, to direct the new Labor government's work in dealing with the unemployment situation.

He is organizing a new government department of employment and is obtaining reports on numerous projects which might supply work for some of the men now unemployed as a preliminary to calling in experts from all the government departments.

With the aid of the experts he hopes to frame definite plans for road-building, housing development and railway reconstruction. At the same time he is not to forget emigration and the development of the Empire and, the part they may be made to play in reducing the army of unemployed.

Products Of Canada's Farms

The four leading items in the total agricultural production of Canada in 1923, valued in all at \$1,730,394,000, are: Field crops, \$1,080,781,000; dairy products, \$250,000,000; farm animals, \$197,880,000; and poultry and eggs, \$106,654,000. Last year was the first year for poultry and eggs to exceed \$100,000,000 in value. Since 1923 there have been increases in value from \$62,000,000. Value of farm animals in five years has advanced \$72,000,000.

Most Obdient

Mamma: "And were you a nice boy at the party?"

Bobby: "Yes mamma."

Mamma: "You didn't ask twice for anything at the table, did you?"

Bobby: "No, I didn't. I asked once, and they didn't hear me, so I just helped myself."

"What has happened to you? Shall I take you home to your wife?" "Thanks. I have just come from there."—Buen Humor, Madrid.

W. N. U. 1790

A Forest Of 2,000 B.C.

Ancient Douglas Fir Standing At Bottom Of Lake In Oregon

An unspoiled wilderness of Douglas fir trees stands upright on the bottom of Clear Lake, in Linn County, Oregon, probably green and flourishing in 2,000 B.C. These trees are told by John D. Guthrie, writing in American Forests (Washington), were growing in a little valley high up in the Cascade Range, when, about 2,000 B.C., or before, there were eruptions from many peaks along the crest. The peaks belched forth lava, and the molten stream spread out over thousands of acres. A tongue of this flow must have run into the little valley of the McKenzie and almost filled it. Then:

"The heat may have killed the Douglas firs in the valley, or they may have been literally drowned by the rising waters. In any case, the river gradually filled the little valley above the lava dam, submerging the fir trees, and formed a lake about a mile long.

The Douglas fir trees are still standing on the bottom of the lake. The waters are the coldest of any of the Cascade lakes, and crystal-blue, so that the bottom, shining white with the volcanic ash of long ago, seems but a few feet below you. With the air excluded, these old trees have been perfectly preserved through all these centuries, and today the wood is readily identified. It is as sound as ever, with no breaking down of the woody tissues whatever, nor any evidence of infestation of any kind." Literary Digest.

To Protect Civilians

International Red Cross Commission Will Start World-Wide Propaganda

A world-wide campaign for the protection of civil populations against the future possibilities of aerial and chemical warfare is to be inaugurated soon by the International Red Cross Commission. The movement will take two forms: world-wide propaganda to acquaint civil populations with the dangers of aerial and chemical warfare and world-wide competitions for the perfection of new means of defense against such attacks.

SLENDER TYPE

You'll be attracted by its simple sophisticated lines. With V-neckline and lower edge of bodice at waistline shirred with bow trimming. It adapts itself beautifully to the season's newest fabrics in printed silk crepe, plain silk crepe, printed rajah, crepe satin, crepe de chine, rayon printed voile, handkerchief linen, printed pique, gingham check in cotton or silk crepe, georgette crepe, and canton-tulle crepe. Style No. 462 is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. It is made with 1 1/2 yards of 40-inch material with 1/2 yard of 36-inch contrasting in the 36-inch size. Just two major parts to pattern, which means practically only side and shoulder seams to join. Price 25 cents in stamps or coin (cash preferred). Wrap coin carefully.

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Spring Fashion Magazine. It's just filled with delightful styles, including smart ensembles, and cute designs for the kiddies.

RIGHT HON. RAMSAY MACDONALD
Leader of the Labor Party and Premier of Great Britain.

Recipes For This Week

(By Betty Barclay)

OATMEAL DROP CAKES

3/4 cup butter,
1 cup sugar,
2 eggs,
1 cup milk,
2 cups rolled oats,
2 1/2 cups flour,
1 teaspoon baking powder,
1/2 teaspoon salt,
1 teaspoon cinnamon,
1 teaspoon nutmeg,
1 cup chopped seeded raisins.

Cream butter, add sugar, eggs well beaten, milk and rolled oats. Mix and add dry ingredients. Add raisins to mixture to first mixture, thoroughly mix. Drop by spoonfuls on a greased baking pan and bake in a rather hot oven. This makes 32 to 36 cookies.

NEW YORK SALAD

4 slices pineapple,
1/2 cup celery,
1/2 cup nuts chopped,
2 oranges,
Cream mayonnaise,
Lettuce.

Arrange slices of pineapple on nests of lettuce leaves. Cut celery in slender strips, one and one-half inches long, and mix with nut meats. Pile in centre of pineapple, and garnish with four sections of orange, free from membrane, laid symmetrically on pineapple. Pass dressing separately.

'Talkie' Novels Now

People Can Enjoy Book Without Trouble Of Reading It

'Talkie' novels have come as the natural sequence to talkie movies.

The first talkie novel is a story "Attaban," by Andre Cayatte, and has been put up in a series of phonograph records, each record containing a chapter. The story is related by the author.

Several others are in preparation, but the plan has been changed by using men and women to recite the lines of the characters of the novel, to do away with "says she" and "says he."

Editors of the 'talkie' novels predict a great future, principally because it will now be possible to enjoy a book without even the effort of turning every page.

New Yorks Are Common

Americans may believe there is only one New York, but England has three and Scotland one. England recently claimed a New York in Kent, Lincolnshire and Northumberland counties and immediately all good Scotchmen pointed to their New York on the western shores of Loch Awe.

Offered High Position

Clarence Chamberlain, trans-Atlantic flyer, wants a young woman secretary who will do her stenographic stuff in the air. He is willing to "iron out" the bumps and make the work as pleasant as possible. His frequent and long-distance flights, he says, necessitate the engagement of an air secretary.

Canadian Journal Of Research

Bi-Monthly Publication Has Been Launched By National Research Council

The National Research Council of Canada, now actively in operation under the presidency of Dr. H. M. Tory, has commenced the publication of the "Canadian Journal of Research," a bi-monthly scientific magazine, the first issue of which came out June 4.

The journal is to furnish a means for publication of the scientific papers resulting from the activities of the Canadian universities, the National Research Council, and the research agencies of Canada which, hitherto, have been dependent on foreign journals already over-crowded as a result of the activities of their own scientists.

The first issue opens with "studies on the nature of rust resistance in wheat," with three papers by K. Newton, professor of Field Crops of Alberta University, and J. V. Lehmann, and A. E. Clarke, post graduate students of that university. It is the contribution of the laboratories of the University of Alberta.

These studies form part of a co-operative attack on the problem of cereal rusts in Canada which cost the Dominion millions of dollars loss every year. This research is being carried on jointly by the council, the Dominion department of agriculture, and the universities of Alberta, Manitoba, and Saskatchewan.

The journal also carries a study of "the hydration of the aluminates of calcium," by Prof. Thorber Thorvaldson, of the University of Saskatchewan, and "Norman S. Grace, a post-graduate student of the university.

"Vaccination against tuberculosis with bacillus calmette-guérin," is a contribution by A. C. Rankin, Dean of the Faculty of Medicine and Professor of Bacteriology and Hygiene in Alberta University. It covers four years' work on B.C.G. vaccine, during which 250 calves were made the subject of experiment. The vaccine was found to be entirely harmless and the tuberculosis lesions in vaccinated calves were found to be in general much less pronounced than those in unvaccinated animals.

Brooker Klugh, assistant professor of Biology, at Queen's University, Kingston, contributes a manuscript on the effect of the ultra violet component of sunlight on certain marine organisms.

Synthetic Gem Factory

The German eye trust has now taken up the manufacture of synthetic precious stones. The plant is near Bitterfeld, and can fill a third of the world demand for jewels. It is only a question of time and care in manufacturing before stones of 300 and more carats will be produced. The process itself is a secret.

More than two-thirds of all astronomical observations are made nowadays with the aid of photography.

Opportunity for
British Traders

Canada Offers Good Market For Empire Made Goods

The great bulk of Canadian imports come from the United States, a nation which has been consistently selfish, if not hostile toward this country. Sentiment in Canada is strongly in favor of the purchase of British goods rather than American. The opportunity is here for British traders to capitalize on this sentiment. To do so, they must take a leaf out of the American book. They must send representatives here to get into close touch with Canadian conditions and market requirements. More vigorous merchandizing methods are essential. The appointment of an agent in Montreal or Toronto to look after the entire Canadian market is an obsolete arrangement. There must be more vigorous commercial penetration and the results will justify the cost. Calgary Herald.

Phosphates For Fertilizers

Manufacture Of Fertilizers On A Large Scale To Be Carried On In B.C.

The vast deposits of phosphates in British Columbia, to be converted into fertilizer by the Consolidated Mining and Smelting Company, will save the "wheat sick" parts of the grain belt in Western Canada, and C. G. Castle, of Victoria, formerly member of the Canadian Grain Commission, the other day. "The ally," he said, "the manufacture of fertilizer on a large scale will be the greatest salvation the western provinces have ever known. It will cause an increased yield; an earlier harvest, closer settlement and bring a reduction of taxation."

A Large Order

Mrs. Highty-Tighty: "And these are all the vacuum cleaners you have?"

Dealer: "Yes, madam. I have shown you all we carry."

Mrs. Highty-Tighty: "Well, I'm afraid they won't suit. I want one from the Louis XV. period to match my antiques."

"Nurse," said an anxious patient, "I'm in love with you. I don't want to get well."

"Cheer up, you won't," she assured him. "The doctor's in love with me, too, and he saw you kiss me this morning."

Bill: "With who was your wife quarrelling last night?"

Quarreller: "Oh—er—she was scolding the dog."

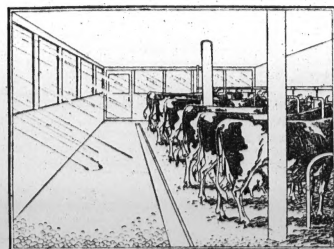

Bill: "Poor beast—I heard her threaten to take the front door key away from him."

A lot of people would have fewer troubles if they would think less about the injustices of life and work more.

WINDOLITE The Improved
Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, bird, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 140 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard; f.o.b., Toronto.

Use WINDOLITE and let
YOUR PLANTS

Good

Blue Ribbon Tea

Only choice leaves grown at high altitudes go into the blending of Blue Ribbon Tea. That is why its flavour is so uniformly excellent. Insist upon getting it from your grocer—refuse substitutes of inferior quality.

The Desert Song

—BY—

VIRGINIA MORRIS

Copyright 1929 Warner Bros. Pictures, Inc.

"The Desert Song" is a Warner Bros. production of this novel, it is based upon the story by Edith Maude, Laurence Schwab, Greig Hurrell, and Frank Standish.

CHAPTER IV.

Margot Bonvalet was alone. It was late afternoon and she had just given Paul Fontaine her answer. General Birabeau would marry them that night. She was allowing herself a few last moments of meditation. Leaning against a tremendous mosaic archway, she stood on the balcony and gazed at the vast desert. It awoke in her heart an infinite longing, the ache for an indescribable something that would never be fulfilled. This was not the wedding day of her which she dreamed.

Her reverie was broken as a man's figure vaulted the railing behind her. She gave a startled cry, for the stranger was clad in a burnoose of flaming scarlet and his face was hidden behind a protecting mask.

"Oh, you're the Red Shadow!" she managed to exclaim when she had recovered her breath and had steadied herself against a chair.

He bowed gallantly. "A votre service, Mademoiselle."

Margot assumed a dignity that she did not feel. "How dare you come here?" she demanded.

"I heard you call for romance," her visitor explained. "I, too, long for romance and I would dare anything to get what I want. But what would you dare: that's what I came to find out."

"Do you realize that one scream from me would wipe out the Red Shadow?" she asked him.

The mysterious stranger shrugged his shoulders. "You wouldn't call for romance in one breath and toss it away in the next."

The ardor of his voice grew as he leaned toward her. "Will you come with me?" he begged. "If you come, I promise not to hold you, but you will stay."

Margot had been clutching her riding crop to give her confidence. Now she raised it quickly. With it she struck the man before her straight across his face. He buried his head in his arm to alleviate the pain and reeled against the balcony rail.

But the girl's indignation quickly cooled. She was alarmed at what she had done. "Oh, oh, I've blinded you!" she cried, running over to him. But the Red Shadow had by now recovered himself.

"HELPED ME WONDERFULLY"

Woman Strengthened by Taking Lydia E. Pinkham's Vegetable Compound

Port Colborne, Ont.—"After having an operation, I was very miserable, weak, nervous and unable to do any work. I saw Lydia E. Pinkham's Vegetable Compound advertised and tried it and believe it helped me wonderfully. I have no more pain. I feel much better. I have left me and my nerves are much better. I am in saying Lydia E. Pinkham's medicine has helped me wonderfully."

Mrs. Wm. H. Bennett, Box 143, Port Colborne, Ont.

W. N. U. 1790

All Ben Ali received him in a great hall sumptuous with oriental luxury.

"Once more, Ali, I beg your kindness and shelter."

"Should not I protect the protector of my race? What is it this time? Have you learned down a prison or kidnapped a tax collector?"

"This time it's a little different," admitted his visitor with a smile.

"Ah, yes, to be sure, you bring two women—captives—that is unusual. Many times I have offered you the hospitality of my Harem but you have always been as shy about women as—as a Christian."

From the garden, Sid El Car entered with soldiers guiding Margot and Susan. Both of them were blindfolded but the Red Shadow immediately ordered the bandages removed from their eyes.

"Where's my Bennie?" demanded Susan, querulously.

Margot, still tugging at the ropes that bound her hands, cried "Where's that brute—that outlaw—that kidnapper?"

The Red Shadow bowed very low before her. Sheik Ali Ben Ali ventured a suggestion of hospitality, but he addressed himself to the leader of the Rifis. "I presume you want them to get the same treatment as my women—here you want them, bashed?"

The Red Shadow nodded. "By all means."

"How dare you?" protested Margot. "As a French citizen, in the name of the republic of France, I demand to be released!"

Firmly but quietly, two slaves led the women away. Susan relished the adventure as much as Margot shrank from it. Some Rifis had brought in the captured journalist, Bennie Kio, who was already rousing his secretary's jealousy by his not too furtive glances at the seductive Spaniards.

"Oh, Bennie!" squealed Susan, "he's taking me upstairs. But somehow, Bennie made no movement of protest."

An hour later the Red Shadow received from his host the advice that the French girl was alone in the upper chamber. He found this room to be a gorgeous apartment lighted by green glass lamps that burned like coals and suffused a weird effect. Margot was sitting on a low silk couch. Her dusty riding habit had been exchanged for a flimsy chiffon skirt that revealed every line of her alluring body. A narrow pearl bodice took the place of a waist and her bare arms were bracketed with broad bands of precious stones. She was far more beautiful in eastern garb than the Red Shadow had ever seen her before.

"Why did you bring me here?" was Margot's first question when the Red Shadow entered. She arose from the couch and stood in a defiant attitude.

"Why?" he replied. "To teach you to love me—so fiercely that you could give up home and friends. Call it a mad dream, but mad is it. I'm willing to risk my whole future to make it come true!"

"Leave me out of it," she answered. "I hate you! I love Paul!"

But the Red Shadow knew better. With a final positiveness, he told her, "You do not—love—him! Come to me!"

His persuasiveness had not won her, for she shrank from him. "Tell me one good reason why you will not," he insisted.

"Why there—there are many."

"Give me one!"

"Why I love— I love Pierre Birabeau. I know that I do. Once I dreamed of romance and adventure, but I've had enough of it. I want the quiet life that Pierre planned for me!"

The Red Shadow made an impulsive attempt to take her in his arms, but before he could do so the door burst open and Ali Ben Ali entered—followed by—General Birabeau!

The Sheik motioned to them. "Believe me, I wish to prove myself a friend of the French. You see my people are innocent. He stole her—I know nothing!"

The Rifis along with Ali Ben Ali's men, now crowded into the room. General Birabeau turned to the owner of the desert place. "Sir, Azuri came alone—and I want to take this girl back with me!"

In The Locker Room

"Minard's is the stand-by of those who take care not to suffer from stiffness and aching muscles."

Birabeau walked directly to the masked leader of the Rifis.

"Azuri tells me that you've boasted that no man can beat you in single combat. Well, I am going to kill you or you will have to kill me!"

For the first time the Rifis saw the Red Shadow turn pale and shrink back from a challenge. Without explanation he ignored the insult of the Frenchman. Even Birabeau was agast with astonishment.

Ali Ben Ali, who knew the ruthless code of the desert, warned the masked man. "What has come over you, friend? Your own followers will send you out in the wilderness to die if you do not fight him!"

Still the Red Shadow made no attempt to defend his honor. General Birabeau, nevertheless, would not let the outlaw evade him.

"So this is the famous Red Shadow?" he sneered. "The myth that has frightened all Morocco! I think you're a coward!"

Still the Red Shadow made no attempt to defend his honor. General Birabeau, nevertheless, would not let the outlaw evade him.

heard. A moment later Captain Fontaine burst into the room and the instant Margot saw his face she knew that his mission had been successful. He was followed by General Birabeau, who asked, "Tell me what happened?"

"We killed him!"

"Who? Which one of the soldiers?" the commandant enquired.

Paul Fontaine hesitated. "None of our soldiers. But the last man you would ever suspect."

The door opened and Pierre Birabeau stood before them. Over his arm was the cloak and the mask of the outlaw's broken sword. Gradually his father realized the dajing of the son he had almost despised. It was he who had killed the dreaded enemy. In a rush of emotion he put his arms around the boy and held him close. Then another realization slowly possessed him, for he whispered so that only Pierre could hear, "You were harvest when you refused to fight."

That evening Pierre Birabeau was the acknowledged hero of the post. Margot alone failed to congratulate him. The General, bursting with pride, at the bravery of his own boy, urged him to tell the girl the details of his amazing exploit. As he left the room he saw Pierre, not his arm around Margot Bonvalet and he had never dared that before!

"Margot—!" Pierre began.

"Please, Pierre—don't tell me anything more. I want to be left alone."

"But answer just one question, Margot, and then I will go. Did you love this man very much?"

"There were tears in the girl's eyes. 'Yes, I loved him—as I never will love anyone else.'"

Pierre did as he had promised. He went quietly from the room. When she knew that she was alone Margot gave way to all the despair that had been stifling her since the night before, since she started back over the desert, leaving the Red Shadow to face the horrible punishment he could not escape. Her own sobs prevented her hearing the door through which Pierre went open again. She felt a hand on her shoulder. At first it seemed impossible—it was the distorted image of her broken heart. But when she felt his lips against hers she knew that it was true. The Red Shadow her lover was there, dressed in his scarlet burnoose, his face hidden by the mask he had always worn.

Then, after that long embrace, she saw Minard's for the rule dawn. Lifted the mask. And she knew that the greatest romance of all was ahead—the tempestuous love of the Red Shadow and the protecting tenderness of Pierre.

THE END

Willie: "May I go and play with Tommy Wilks?"

Mother: "Tommy Wilks has gone to the seaside with his father. Why not go and play with Jackie Smith?"

Willie: "I played with him yesterday, and I don't expect he'll be well enough yet."

The Mediterranean has very slight tides at most places only a few inches.

Firestone TIRES

FIRESTONE Tires are the outstanding choice of those who demand the greatest safety for high speeds, rugged endurance and utmost economy. Gum-Dipping, the extra Firestone process, combined with the Firestone Safety Thread, makes these tires the toughest, longest-wearing tires on earth.

Made in Hamilton, Canada, by Firestone Tire & Rubber Co. of Canada, Limited

Nearly 2,500,000 tons of rice will be raised in the Philippines this year.

WHEN BABY IS WELL MOTHER IS HAPPY

The happy mother is the one whose baby is well. It is the laughing, gurgling baby who always brings joy to the home. When baby is ill everyone in the home suffers—not only through worry over the little one but through loss of sleep—no one can find rest with a sick baby in the home. Thousands of mothers are happy mothers because they have found the way to keep their little ones well—or if sickness does come on suddenly, as it usually does with little ones, they have found the way to speedily bring the baby back to health again. Mrs. George Keck, Lindberg, Alta., is one of these mothers, and she writes as follows: "I am the happy mother of a seventeen-month-old baby girl. Baby is healthy and strong and sleeps well at night. I give her no other medicine but Baby's Own Tablets, and she just loves them. I am never without the Tablets in the house."

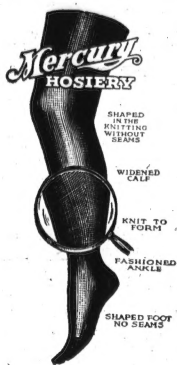

Baby's Own Tablets are a mild but thorough laxative which regulate the bowels; sweeten the stomach and thus drive out constipation and indigestion and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Most of the members of Grattan Lodge A.F. & A.M. motored to Wainwright Wednesday night when joint installation was held for the officers of Buffalo Lodge of Wainwright and Grattan Lodge of Irma. The new Masonic building was filled with the members of the Wainwright Lodge and visiting Masons from Viking to Chauvin.

Now is the time of the year to advertise for those stray horses and cattle. A small ad in this paper will help you.

Here and There

(301)

The Prince of Wales has again extended his patronage to the Banff Highland Gathering and Scottish Music Festival to be held this summer at the Banff Springs Hotel in the Rockies. Pipers, dancers, and athletes from all parts of the country compete in these popular games.

Two baby black bears were great attractions recently at the Detroit Sportmen's Show. They were from Phil Lanothe at Mattawa, Ontario, and were escorted to their destination by a member of the C. P. R. general tourist department, who had sundry scars to show in proof of the existence of the babies' first teeth.

Enough flowers are planted by the Canadian Pacific Railway each year to beautify a couple of cities. The floral branch each year sends out to station agents and employees along the line plants, bulbs, shrubs, seedlings, and seeds by the tens of thousands to decorate the company's right-of-way.

Five railway cars were required to move the equipment of the mammoth Casavant Organ recently installed in the new Royal York Hotel in Toronto. The hotel is the tallest building in the British Empire.

Tyndall stone, which shows to such great effect in the famous Banff Springs Hotel in the Rockies, is to be used in the construction of the new building for the T. Eaton Company in Toronto, the first unit of which is now being built.

The year's champion cattle raiser in British Columbia is Annie Turner, twelve-year-old daughter of James Turner, Cadboro, Bay stock breeder. Her 14-month-old short-horn steer, sired by Braidhill Marquis and weighing around 1,100 lbs., won the grand championship of all breeds at the Kamloops bull sale and fat stock show.
